

KALLPOD PLUS

SIMPLIFYING COMMUNICATION
AND SUPERCHARGING YOUR
BUSINESS WITH THE PUSH OF A
BUTTON.

Simplified experience.

Kallpod Plus is a physical tabletop device that connects guest to staff and internal teams to each other. The Kallpod Plus button facilitates an immediate and direct connection to a staff member's Kallwatch, indicating the location and the type of service requested.

Guests push a button and sit back to enjoy the experience.

Do more with less.

Keep your guests happy by giving them what they want when they want it.

Boost productivity for your venue's full scope of operations, including both front-of-house and back-of-house service delivery.

Easy to setup.

Kallpod Plus hardware is shipped to your business preconfigured with minimal setup and no WiFi required.

Simply set the Kallpods to their assigned location and you're done.

Kallpod allows for a focused, intentional service model, so we aren't bugging the customer as they're trying support a meeting or event, but we will be right at their table the minute they need us.

How it works

Place Kallpod Device

Simply place the Kallpod in its assigned location, place the transmitter in a centralized spot, and have your staff turn on their Kallwatches. You're good to go!

Guests Initiate Request

Guests or staff simply need to press one of the three service buttons on their Kallpod, all of which are fully customizable.

Staff Receives Request

Staff assigned to that area will receive a notification on their Kallwatches that displays the location and type of service requested.
